

# Aerohive Testflight

**AEROHIVE**  
NETWORKS

We would like to invite you to our interactive **Aerohive Workshop**, where you will receive your own Aerohive Access Point and learn hands-on how to configure, integrate and roll it out into any typical Network Scenario.

## WHAT CAN YOU LEARN IN THIS TRAINING?

During this hands-on workshop, you will configure network settings yourself and will experience first hand how easy and simple it is to operate and deploy Aerohive's Management Platform.

You will learn the business benefits of a controller-less Wi-Fi solution and will have the opportunity to discuss your specific business challenges directly with our specialists during the Networking session at the end of the workshop.

## Audience

The Aerohive TestFlight is ideal for technical people and presales that want to place their first steps in the Aerohive product portfolio. After a short theoretical explanation, you will do a hands-on lab and learn by doing, so don't forget to bring your laptop.

## Prerequisites

None

## Objective

At the end of workshop you would have completed the following:

- Completed a typical Wi-Fi network planning scenario
- Integrated Aerohive APs in the central management tool (HMOL)
- Created network policies that enable employees and guests on your network
- Configured auto provisioning - an easy roll out of APs without any pre configuration

## SOLUTIONS

- **CONFIGURE**
- **INTEGRATE**
- **ROLL-OUT**

## PRICING

Aerohive Testflight	
KD Training Center	Free of charge
Aerohive AP	Free of charge
