

Connectivity & Security Health Check

Clear insights into the IT environment of your customer – in just one day

WHY CHOOSE THIS HEALTH CHECK?

Don't have the time to dive deep into your customer's IT environment, but still want a clear overview and actionable improvement plan? Our **Connectivity & Security Health Check** is the perfect service to uncover hidden risks, vulnerable systems, End of Life devices and opportunities for optimization – all backed by the professional engineers of Kappa Data. Meanwhile, you take some important steps to become NIS2 compliant.

WHAT'S INCLUDED?

1. Full Network Scan & Asset Discovery

- Identification of all network-connected assets
- Detection of end-of-life devices
- Scan for vulnerable services/operating systems (CVEs, unwanted bridging etc.)
- Backed by our CAASM vendor runZero

2. On-Site Physical Audit

- Physical site visit
- Full report of on-site findings (photos of network components like unmanaged switches, AP placement,...)

3. End-customer interview & Gap Analysis

Besides the scan, we also do a structured discussion with the customer. We assess the maturity of their security practices, covering parts like (not limited):

- **Identity & Access Management:** MFA, FIDO2 tokens, onboarding/offboarding processes
- **Email Security & Endpoint Protection**
- **Backup & Disaster Recovery**
- **Network Access Control:** NAC, guest WiFi, ZTNA, SASE solutions
- **IT Management:** centralized management, MDM, shadow IT risks
- **Monitoring:** network, cloud, database, virtualization
- **Firewall/WAN:** next-gen firewalling, SASE
- **Detection and Response:** EDR, MDR, XDR
- **Application:** WAF, load balancing, monitoring

4. Final Report & Improvement Plan

WHAT YOU GET:

A clear picture of your customer's **IT & security** landscape

A fast, efficient **health check** – no internal resources needed

Trusted expert recommendations and a foundation for **follow-up projects**

A strong **upsell opportunity** for solutions and services

Take important steps to become **NIS2 compliant**
